

## **IMPORTANT!**

- This oven contains a two-piece grill shelf for grilling on the top shelf using the **Grill** setting, and two rack shelves for baking.
  - Please take note of the parts inside the oven and how they fit together. Do not lose or misplace them.
  - The grill shelf has a shelf frame and grilling dish that fits into it.
  - The oven door must be kept **closed** when using the grill.
- The bottom floor surface of the oven is a **heat source** when the oven is turned on. **Do not place anything directly on the floor of the oven when baking food in the oven.**
  - Otherwise the oven will not heat properly, and the bottom of the oven will be damaged by trapped heat.
- The cast-iron hotplates on the stove-top should be wiped periodically with a **small amount** of light cooking oil (e.g. sunflower oil, rice oil, etc.) as needed.
  - Run the hotplate on HI for 3 minutes to dry and fix the oil coating.
  - Do not apply olive oil as it will burn and produce smoke when the stove is turned on.

Please refer to the instructions before using the cooking appliance.

The Chef oven/stove instruction manual is available online:

1. Go to [21rowell.com](https://21rowell.com)
2. Navigate to the Residents' portal → Instruction manuals.
